This Article is brought to you for free and open access by the Jefferson Digital Commons. The Jefferson Digital Commons is a service of Thomas Jefferson University's [Center for Teaching and Learning \(CTL\)](#). The Commons is a showcase for Jefferson books and journals, peer-reviewed scholarly publications, unique historical collections from the University archives, and teaching tools. The Jefferson Digital Commons allows researchers and interested readers anywhere in the world to learn about and keep up to date with Jefferson scholarship. This article has been accepted for inclusion in *Sci-Tech News* by an authorized administrator of the Jefferson Digital Commons. For more information, please contact: [JeffersonDigitalCommons@jefferson.edu](mailto:JeffersonDigitalCommons@jefferson.edu).

## NEWS TO NOTE

Readers may remember this column from earlier issues. It is being revived in order to provide a place to present news items of general interest and, hopefully, to serve as a column where individual readers may provide news items about themselves and their friends. New jobs, special awards, new techniques---literally, a host of topics that will serve to keep us better informed of each other's doings are welcome for this section. **KEEP YOUR FRIENDS INFORMED OF WHAT YOU'RE DOING!**

---

**Nancy Panella**, Librarian at St. Luke's-Roosevelt Hospital Center in New York City, has been a participant for many years in IFLA's annual meetings. This year she was elected to a four-year term as a member of the IFLA standing committee which represents the IFLA section known as **Libraries Serving Disadvantaged Persons**. Other members represent a total of nine countries. The committee is currently revising Library Services to the Deaf, Guidelines for Library Services to Hospitals. Nancy chairs the working group revising these guidelines. She holds a Doctor of Library Science degree from Columbia University.

**Marsha Saylor** recently took a position as Technical Information Specialist at Michelin Americas in Greenville, South Carolina. The firm has upgraded its research program, and she will be its first professional librarian

Librarians who were clients of the **Engineering Societies Library** before its collections were for the most part moved to the Linda Hall Library in Kansas City may be interested to know that its former home, across the street from the United

Nations campus in New York City, is in the process of being dismantled to make room for a new building. Its developer, Donald Trump, hopes to create what he terms the world's tallest residential building. He plans for the apartment building to have more than 70 floors

**Ellis Mount** was recently selected to receive the Distinguished Alumnus Award from the Library School Alumni Association of the University of Illinois School of Library and Information Science.

**Bonnie Osif** is spending several months in Europe working on a study of European transportation systems, a funded research project which she developed.

**EDITOR-IN CHIEF:**

**Paul von Rague Schleyer**, University of Erlangen-Nürnberg, Germany

**EDITORS:** **Norman L. Allinger**, University of Georgia, Athens, USA,

**Tim Clark**, University of Erlangen-Nürnberg, Germany,

**Johann Gasteiger**, University of Erlangen-Nürnberg, Germany,

**Peter A. Kollman**, University of California, San Francisco, USA,

**Henry F. Schaefer III**, University of Georgia, Athens, USA,

and **Peter R. Schreiner**, University of Göttingen, Germany

- Editors Schleyer, Allinger, and Schaefer initiated the field in 1970
- The first comprehensive work to cover all areas of computational chemistry
- A unique reference source for computational chemists and non-specialists alike
- More than 300 leading scientists contribute in-depth encyclopedic articles
- Over 500 color illustrations enhance the presentation of topics
- Comprising 5 volumes with over 3,500 pages

In its relatively short history, computational chemistry has become one of the mainstays of modern industrial & academic chemistry. **The Encyclopedia of Computational Chemistry** provides a comprehensive reference work for many aspects of this young & fascinating discipline. All aspects of computational chemistry are discussed and methods and important applications are described. **ECC** is aimed at both computational chemists and experimental chemists who employ computational methods
